

1.1 TSG Putting System Intro | Are You Focusing On the Wrong Thing?

How would you like to be the most clutch putter in your foursome? The guy that gets over the eight-foot downhill slider to win all the skins, or in a big pressure match maybe you're playing in your club championship and you need this to win the match, and you can drain it almost every time.

Well, everybody wants to be that clutch putter. A lot of people think that it's something that you're born with, you have to be somebody that's just naturally very good under the gun, but it actually can be learned.

As long as you know the right fundamentals and the right pieces to work on, you can be that clutch putter. This is actually what I'm going to show you guys in the Top Speed Putting System.

So in the system we focus in on the six key principles, the six fundamentals to be able to putt really, really well.

Now there's thousands of things we could talk about in putting, but we've eliminated down to the six most important pieces and that goes with our 80/20 rule, which basically means you're going to get 80 percent of your results from just 20 percent of your work.

So these six factors are the ones that are going to help you to get the best results right away.

In this video you're in level one, which is the introduction. Now levels two through seven are going to be the six fundamentals. We're going to break them down piece by piece.

The reason this is a little bit different, most of the time when you read something on putting, everybody gets obsessed with getting the stroke just perfect and having it exactly how it needs to be, and we forget about the rest of the game.

That's just one of the six fundamentals. I'm going to go over all six so that you can be really, really good on the greens.

So we're going to have those six fundamentals and then in the level eight, we're going to go into the pro drills. So some of the best players in the world, players like Tiger Woods, Jordan Spieth, some of the top pros.

I'm going to show you their routines and some of the games and practice drills that they use day in and day out to putt their best.

I'm going to break it down for you, and I'm going to show you what to focus on as you're doing these drills.

So that's the Top Speed Golf Putting System, levels one through eight. Let's go ahead and get started with level two, mastering that stroke.

I'm going to go over some of the real keys to becoming great on the greens and being that clutch player. Good luck to you guys, I'll see you all in the next video.
